AHAMMAD NAFIZ

ahammadnafiz86@gmail.com • Portfolio • GitHub • LinkedIn

TECHNICAL SKILLS

Languages & Core: Python, C++, PyTorch, NumPy, Pandas, Scikit-learn

AI/ML Frameworks: LangChain, LlamaIndex, CrewAI, AutoGen, Hugging Face Transformers

Specializations: Agentic AI, LLMs, Deep Learning, Computer Vision, NLP, Prompt Engineering, Vector Embeddings

Tools: Git, Docker, Linux, VS Code, Streamlit, FastAPI, FAISS, Plotly

KEY PROJECTS

Predicta - ML Pipeline Platform *2024 – Present*
GitHub

- Engineered scalable ML pipeline with automated feature engineering and dynamic model selection
- Delivered production-grade workflows with hyperparameter optimization and performance monitoring

Analyzia - AI CSV Analysis Platform *2025*
GitHub

- Architected conversational AI interface for data exploration and natural language querying
- Implemented real-time validation and interactive visualizations with advanced analytics

Personal Knowledge Assistant *2025*
GitHub

- Designed multi-agent RAG system with adaptive confidence-based routing and web integration
- Implemented semantic search with document retrieval optimization and full-stack architecture

EduGen - Educational Content Generator *2025*
GitHub

- Developed LLM-driven pipeline for curriculum-aligned science animation generation
- Orchestrated multi-domain content creation spanning physics, chemistry, biology, and CS

WORK EXPERIENCE

Head of Research & Development *Mar 2025 – Present*
UIU Data Science Club

- Spearhead AI/ML research initiatives and mentor students in advanced machine learning methodologies
- Orchestrate workshops on neural networks, transformers, and enterprise ML deployment strategies

Undergraduate Teaching Assistant *Jun 2024 – Jul 2024*
United International University

- Facilitated OOP laboratory sessions for 40+ students with emphasis on advanced Python programming
- Pioneered debugging methodologies resulting in 25% improvement in student performance metrics

Illustrator & Brand Designer *Aug 2023 – Present*
Freelance

- Conceptualized data-driven brand identities leveraging Adobe Creative Suite and market intelligence
- Delivered premium design solutions achieving 95% client satisfaction through agile methodologies

EDUCATION

B.Sc. in Data Science *Sep 2023 – Present*
United International University, Dhaka
